## BILLINGS HAS NEW COMMUNITY HOUSE.

Building Dedicated Recently Will Be Used As Exhibit Pavillion During Stock Show.

Springfield, April 18.—The first community house in Christian county was dedicated last week at Billings, when the Commercial club of that town opened for public use the pavillion which has been under construction for several weeks. The building will be used for an exhibit hall during street fairs, stock shows and other expositions of similar character.

The direct reason for the construction of the pavillion, according to members of the Billings Commercial club, was to accommodate the large crowds attending the monthly sales, which are given under the auspices of the civic association. The first Monday in each month is set aside as sales day, at which time the merchants offer special inducements in the form of real bargains. Aside from the sales at the various stores a public auction is held, and any farmer may offer live stock, farm machinery or other articles for sale. The expense of this sale is paid by the Commercial club.

The new pavillion will in the future be used to accommodate the crowds attending the sale, making it possible to continue the program of the day regardless of weather conditions. The building has been so constructed as to be serviceable for meetings of various kinds and will be placed at the disposal of the entire community.

### INTERNATIONAL HARVESTER COMPANY

REPAIRS made for International implements and other farm equipment by the Harvester Company are the only repairs made from the original patterns. All others are copied from copies, and in this roundabout reproduction they may lose in correctness of shape, sharpness of detail, closeness in fitting, and quality of material. These repairs are made for Deering, McCormick, Milwaukee, Titan and other International-made machines.

### Genuine IHC Repairs

Are Better in Quality  
Fit Better and Wear Longer

The Harvester Company stands back of its machines. Be fair in the matter. Do not substitute imitation repairs for the genuine and expect best service. Repairs made by other concerns and marked "Made for" or "Will fit", are not genuine IHC repairs. They often lack weight, are not always correct in shape, are imperfectly finished, do not fit properly, or are made of inferior material. Buy Genuine International Repairs for your International Farm Equipment.

## A Year's Abuse In 7 Days

All Light Car Road  
Records Smashed

At Indianapolis recently an Overland 4 stock car was driven 5,452 miles continuously in seven days and nights, over frozen country roads.

This is an average of 778 miles per day—more than the distance between Toledo and New York City. This is another tribute to the cushioning effect of Triplex Springs and the quality of material in Overland 4.
